**For Immediate Release – Fort Lauderdale and London**

**Consilium Investment Management (CIM) announced launch of their Corporate Recovery Fund**

INTL Consilium LLC (**d.b.a Consilium Investment Management**), an SEC registered and FSA authorized and regulated investment management firm, announced the launch of their Corporate Recovery Fund (CCRF) which will be focused on debtor in possession (DIP) financing and other super priority loan opportunities. “The Corporate credit recovery space is extremely compelling as rates and fees for DIP loans have risen with the scarcity of loan supply” stated Jonathan Binder, Chief Investment Officer for Consilium Investment Management (CIM). Reduced competition and recent history of increasing bankruptcies have created an opportunity of unusual magnitude for participating in DIP financing. Banks’ traditional role in providing DIP financing will be highly constrained for an extended period of time, creating a significant opportunity for those with the knowledge and expertise in the space. James Anders, Portfolio Manager, stated “The supply of DIP opportunities is going to increase dramatically. We agree with rating agencies that are predicting significantly higher default rates over the next year or two compared to recent history.” Through August 2009, corporate defaults continue to rise with total defaulted debt of \$453.1 billion. This surpasses the default amount for all of 2008. “As a result of its super priority claims, DIP loans are usually over collateralized. Additionally, bankruptcy rules afford DIP lenders special standing in process which creates an even more compelling investment opportunity” stated Charles Cassel, Chief Risk Officer for CIM.
